

Section I (Amendments to the Specification)

Please amend the specification by replacing paragraph [0056] as follows:

[0056] The effervescent material in the gas pill 32 ~~39~~ can be of any suitable type that in contact with water, moisture, or physiological media reacts to liberate carbon dioxide or other inflating gas for the balloon, so that the balloon is transformed from an initial collapsed (deflated) state to the inflated state illustratively shown in FIG. 2.
